

Prashant Jha

Full Stack Developer (MERN)

+91-9981789795 | prashantjha0108@gmail.com | linkedin.com/in/prashant-jha-dev | github.com/prashantjha1448 | Bhopal, MP, India

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building and shipping production MERN applications, including WorkQuora – a live hyperlocal services marketplace built as my final-year major project – featuring role-based auth, real-time updates, and background job processing. Proficient in JavaScript, React.js, Node.js, Express.js, and MongoDB, with practical experience in JWT authentication, Google OAuth 2.0, Two-Factor Authentication, REST API design, and deployment on Vercel and Render.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, Vite, Tailwind CSS, Context API, React Router, Redux Toolkit, TanStack Query, Framer Motion

Backend: Node.js, Express.js, REST API Design, Socket.io, JWT, bcrypt, OAuth 2.0, MVC Architecture, Redis

Database: MongoDB, Mongoose, MongoDB Atlas, PostgreSQL, Schema Design, CRUD, Aggregation

Developer Tools: Git, GitHub, Postman, VS Code, npm, Vercel, Render, Google Cloud Console

Languages Spoken: English, Hindi

PROJECTS

WorkQuora | *Final-Year Major Project* | React.js, Node.js, Express.js, MongoDB, Redis, BullMQ, Socket.io, JWT, OAuth 2.0, 2FA (TOTP) – Present

- **Problem:** Hiring local workers in India (plumbers, electricians, AC repair, mechanics, etc.) is fragmented – people depend on WhatsApp/Facebook groups and word-of-mouth, with no verified platform or way to check ratings/KYC status
- **Solution:** Designed and deployed a live hyperlocal marketplace connecting clients with nearby verified workers through location-based matching, KYC-backed profiles, and ratings
- Built secure role-based authentication (JWT, Google OAuth, Email OTP) across Client, Worker, and Admin roles
- Eliminated API slowdowns from heavy background-job traffic using a Redis + BullMQ queue system, and cut repeated database load via Redis caching
- Delivered real-time job status updates via Socket.io, with a graceful Redis fallback so the backend stays resilient when Redis is unavailable on Render's free tier

Notewave | *React.js, Node.js, Express.js, MongoDB, JWT, OAuth 2.0, 2FA (TOTP)* 2024

- Built a production-ready MERN notes app with a complete auth pipeline – JWT, Email OTP, Google OAuth 2.0, and Two-Factor Authentication (TOTP); deployed on Vercel + Render
- Implemented notes CRUD with soft delete, restore, and permanent delete; image & audio attachments; real-time search; profile picture upload; MVC architecture with MongoDB Atlas

Lokpriyatam | *React.js, Tailwind CSS* 2024

- Independently designed and built the responsive front-end for a tea stall business, owning UI/UX end-to-end solo – from component design to styling with Tailwind CSS

EDUCATION

Lakshmi Narain College of Technology Bhopal, India

Bachelor of Technology – Computer Science and Engineering Aug. 2023 – Jul. 2026

Patel College of Science & Technology Bhopal, India

Diploma – Computer Science Engineering Aug. 2020 – Jun. 2023

Children's Happy Home Bihar, India

10th (Secondary Schooling) 2019 – 2020

CERTIFICATIONS

MERN Fullstack Web Development – Certificate of Excellence Mar. 2026

Sheryians Coding School (Issued by Harsh Sharma, Director) Aug. 2025 – Mar. 2026

Basics of Python Feb. 2025

Infosys Springboard
