PROFESSIONAL SUMMARY

Full Stack Developer skilled in the MERN stack with hands-on experience building responsive, secure, and scalable web applications. Proficient in JavaScript, React.js, Node.js, Express.js, and MongoDB. Built production-ready projects featuring JWT authentication, Google OAuth 2.0, Two-Factor Authentication, REST APIs, and full deployment on Vercel and Render.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, Vite, Tailwind CSS, Context API, React Router, Redux Toolkit, TanStack Query, Framer Motion

Backend: Node.js, Express.js, REST APIs, Socket.io, JWT, bcrypt, OAuth 2.0, MVC Architecture, Redis

Database: MongoDB, Mongoose, MongoDB Atlas, Schema Design, CRUD, Aggregation, MySQL, Prisma

Developer Tools: Git, GitHub, Postman, VS Code, npm, Vercel, Render, Google Cloud Console

Languages Spoken: English, Hindi

PROJECTS

WorkQuora | workquora.com | *Live*

2024 – Present

- Tech:** React.js, Node.js, Express.js, MongoDB, Redis, BullMQ, Socket.io, JWT, OAuth 2.0
- Problem:** Hiring local workers in India (plumbers, electricians, AC repair, mechanics, etc.) is fragmented and unreliable – people depend on WhatsApp groups, Facebook groups, and word-of-mouth, with no verified platform, no real-time updates, and no way to check ratings or KYC status
- Solution:** Designed and deployed a live hyperlocal marketplace connecting clients with nearby verified workers through location-based matching, KYC-backed profiles, and ratings
- Built secure role-based authentication (JWT, Google OAuth, Email OTP) across Client, Worker, and Admin roles
- Solved API slowdowns from heavy notifications and background jobs by offloading them to a Redis + BullMQ queue system, and cut repeated database load with Redis caching
- Delivered real-time job status updates via Socket.io, and engineered a graceful Redis fallback so the backend stays resilient in production when Redis is unavailable on Render's free tier

Notewave | *React.js, Node.js, Express.js, MongoDB, JWT, OAuth 2.0, 2FA (TOTP)*

2024

- Production-ready MERN notes app with a complete auth pipeline – JWT, Email OTP, Google OAuth 2.0, and Two-Factor Authentication (TOTP); deployed on Vercel + Render
- Notes CRUD with soft delete, restore, and permanent delete; image & audio attachments; real-time search; profile picture upload; MVC architecture with MongoDB Atlas

Lokpriyatam | *React.js, Tailwind CSS*

2024

- Independently designed and built the responsive front-end for a tea stall business, including menu display and branding-focused layouts
- Owned the UI/UX end-to-end solo, from component design to styling with Tailwind CSS

EDUCATION

Lakshmi Narain College of Technology

Bhopal, India

Bachelor of Technology – Computer Science and Engineering

Aug. 2023 – Jun. 2026

Patel College of Science & Technology

Bhopal, India

Diploma – Computer Science Engineering

Aug. 2020 – Jun. 2023

CERTIFICATIONS

MERN Fullstack Web Development – Certificate of Excellence

Mar. 2026

Sheryians Coding School (Issued by Harsh Sharma, Director)

Aug. 2025 – Mar. 2026

Basics of Python

Feb. 2025

Infosys Springboard
